Public Access to Computerized Patent Search Data Bases.

The PTO, in cooperation with Intellectual Property Owners, Inc. (IPO), has arranged for the placement of computer terminals in the Public Search Room which access the Pergamon Video Patsearch System. This patent searching tool enables the computerized searching of front page and abstract data contained in all patents issued during the past eleven years. In addition, video searching of selected drawings in these patents is also available by computer search for display on viewing screens. The computer searching service is available to the general public in the Public Search Room for a fee related to the cost of each search. The new service was initiated on Dec. 4, 1981 in a ceremony attended by Senator Charles McC. Mathias, Jr., Commissioner Gerald Mossinghoff, and former Commissioner Donald Banner who is now president of IPO.

RICHARD J. SHAKMAN,
